## Meet Ed & Jeff Frawley of Leerburg® Enterprises, Inc.

Leerburg Enterprises, Inc. is a family owned business that was started in 1980 by Ed Frawley. Ed had owned and trained dogs since 1960. He began breeding dogs in 1978 and producing training videos in 1980.

Cindy Rhodes began training dogs when she was 13. She has competed in AKC & CKC obedience and Schutzhund, a protection dog sport. In 1990, she competed in the USA SchH 3 Nationals with a Doberman female she raised from a puppy. She has bred Dobermans & Malinois under the kennel name Kaiserhaus since the late 80's. Cindy has raised and trained dogs of many different breeds, Belgian Tervuren, Shetland Sheepdog, Welsh Corgi, Doberman, Belgian Malinois and most recently, Border Terrier. Her sports of choice now are Mondioring and Agility. Cindy was also a professional dog groomer for 15 years.

Ed continued to breed working bloodline German Shepherds for 30 years and only recently retired from breeding so he could spend more time on Leerburg.

During the early 1980's Ed competed in AKC obedience and tracking competitions. In the mid-80's he competed in Schutzhund. He titled a number of dogs in these sports. In the late 80's he started training police service dogs and from 1990 to 2000 Ed was a K9 handler on the local Sheriff's Department.

Throughout the years Ed continued to produce dog training videos; over 500 of which are still available on Leerburg's Video on Demand (400 plus are free streams).

In 1994, Ed went online with Leerburg.com. Leerburg was one of the first dog related web sites on the internet. It has grown into the largest dog training web site on the internet with over 16,000 pages. The Leerburg Web Forum is a free dog training forum that has over 18,000 registered members and more than 330,000 searchable posts in its archives.

From the very beginning Ed's philosophy on selling dog related products was to only offer products he would use to train his dogs. He knew there were dog trainers that insisted on quality products and he chose to fill that niche. Leerburg has never tried to compete with the big box retail stores or the pet food warehouses of the world. Leerburg's reputation has been built on customer service and quality products.

Ed and Cindy have three sons. The oldest, Eric, lives in Houston and works in the commercial diving industry. The youngest, Andrew, is a senior in high school and has already joined the Air Force. He will leave for basic training early summer 2012. Jeff just finished 7 1/2 years in the Army and came to work at Leerburg in the fall of 2011.

### Introducing Jeff Frawley

In October of 2011 Jeff Frawley, Ed Frawley's son, came to work here at Leerburg. After 7 1/2 years of military service, including tours in Iraq and Afghanistan, Jeff left the army. Jeff served in every position of an airborne infantry platoon with the 82nd Airborne from rifleman up to a squad leader. During his years of military service Jeff also spent time training cadets at West Point.

Jeff grew up here at Leerburg and has lived with dogs his entire life. The fact is Jeff was on the cover of one of our Leerburg catalogs 20 years ago when he was just 6 years old (see photo below). When Jeff was 8 years old, his first job was here at Leerburg, for \$1.00 per hour, as chief socializer of puppies. When he was ten years old, he began helping Ed in the kennel. By the time he was 14 he had helped deliver more litters of German Shepherd puppies than we can remember. During his high school years, Jeff went with Ed as a cameraman and filmed a number of training seminars and dog shows.

In addition to being Leerburg's new business manager, Jeff's responsibilities will include producing dog training videos and short commercials on Leerburg's products (which will be posted on our web site). If you get our newsletters you may already have noticed a new voice on our free weekly training videos.

We are very excited about the addition of Jeff to our Leerburg team.

## Details Below:

In 2011, Leerburg launched our new online streaming video application, Leerburg On Demand. We currently offer over 500 videos, with more being added every week. Over 400 of these videos are free for everyone to watch, and users who sign up for a free Leerburg account will be able to purchase and watch streaming video versions of our DVDs as well. These videos are available immediately upon purchase, with no waiting or downloading required, and you can watch them as many times as you want. In addition, registered users can rate and write reviews for all our videos.

The material found in our videos is not available on any other dog training website. In addition to streaming our Leerburg DVDs, we offer exclusive content such as lectures by Michael Ellis and footage of historically significant dog competitions previously available only on VHS. You can also watch any of the videos featured in our bi-weekly newsletter for free.

Leerburg On Demand is available on computers, iPads, and iPhones with high-speed or broadband internet access. All purchased videos are tied to the user's account, and can be accessed anywhere by simply logging in. This cuts out the hassle of keeping track of DVDs and eliminates shipping costs altogether.

### Instant Access When You Purchase a DVD

We're very excited about Leerburg On Demand because we believe online streaming is the future of the video industry. From now on, whenever you purchase any of our Leerburg DVDs you will have the option to get free instant access to any videos you've purchased, including our DVD sets. This means you can begin watching your video immediately after checking out, before the DVD even arrives in the mail. To take advantage of this, all you need to do is sign up and log in with a free Leerburg account. This is especially beneficial for our international customers who would otherwise have to wait weeks for their shipment to arrive.

### Purchase A Streaming Video and Save on the DVD

If you purchase a streaming video and decide you would like to own the DVD as well, you can put the amount you paid for the streaming video toward the DVD purchase. When you buy the streaming version of any of our DVDs, you will automatically receive a personal, single-use coupon code for the amount you already paid off the price of the DVD. If you paid \$35.00 for the streaming version of a \$40.00 DVD, you can use the coupon to save \$35.00 on the DVD purchase. If the streaming video is the same price as the DVD, you can purchase the DVD for free and will only have to pay the cost of shipping.

We have put a lot of time and effort into developing this revolutionary new streaming video application and we're very proud of the way it has turned out. Over the years, this DVD has been one of our most popular training videos for new puppy owners.

The first version of this video was produced in the late 1980's. The version we sell today is an updated production that was completed in late 2010. Over the years we find better ways to raise our puppies. These ideas are passed on in the new releases of this DVD.

This training video answers all the questions new puppy owners have concerning the care of their new puppy. Ed Frawley has been breeding dogs since 1978.

Over the years Ed has been asked just about every question a new puppy owner can think to ask. This DVD was originally produced to be given to every Leerburg Puppy Customer. The intent was to help Leerburg Puppy Customers get through the first 8 months of the puppy's life.

Even though Leerburg bred German Shepherds, this new training video is not just a German Shepherd training tape. It is an all-breed video. "Your Puppy 8 Weeks to 8 Months" is sold to breeders all over the world who breed many different kinds of dogs. These breeders then give the video to their puppy customers. If you are a dog breeder, see [leerburg.com/breeder-discount.htm](http://leerburg.com/breeder-discount.htm) for our breeder's discount.

The goal of this video is to teach people how to train their own dog to become a well mannered family pet. Our DVD was last updated in early 2007. It was originally produced in 1982 and has gone through a number of updates. With each release, it gets better and better.

The problem with taking your dog to obedience class is that the dog is expected to learn new commands under extreme distraction (i.e. when it is surrounded by 10 or 20 other dogs). This is not the correct way to train a dog. In fact, it's totally unfair to the dog.

There are four phases to dog training: the learning phase, the correction phase, the proofing phase, and the maintenance phase.

In the learning phase new commands should be introduced in a distraction free environment; like your kitchen or your back yard or an environment that the dog is used to living in. We teach new commands through positive motivation. During this phase we never correct the dog for not performing the command. It would be unfair to give a correction during this phase because the dog has not yet learned the meaning of the command.

When the dog has learned a command but then refuses to do it, it is time to move into the correction phase of training. This is where the dog learns that if it does not do what it is told to do, it will get a correction. Every dog is different; our video shows how to determine when to give corrections and what level of correction to give different dogs.

When the dog consistently performs obedience commands at home, it is ready for the distraction or proofing stage. During this phase we teach the dog that it must mind no matter where it is or what is going on around it. This means it must follow your commands when people come to your house, when other dogs are around, when on a walk, or when playing with toys.

Dog training never ends. It is in the maintenance phase of training that our dogs learn that we are always constant in our expectations. We show him that we always expect him to follow our commands.

We strongly recommend people establish pack structure before they begin formal obedience training. If you are a new dog owner your goal should be to create a calm submissive dog. The road to accomplishing this is explained in our DVD titled Establishing Pack Structure with the Family Pet. That is why we recommend that new dogs owners get both Basic Obedience and our Establishing Pack Structure DVD.

New pet owners are often told the road to a calm, submissive dog is to attend obedience classes and socialize their dog. We don't agree with this, in fact we think it's bad information.

All dogs are pack animals. Every breed of dog is hard wired with genetic pack instincts. The smallest Chihuahua to the largest Great Dane wants to live in a dog pack. They also genetically want to establish leadership and rank within their pack.

The road to a calm submissive dog is to first establish pack structure and leadership. Once leadership has been determined a dog can then be obedience trained.

I get hundreds of emails every week from people who have behavioral problems with their dogs. 99% of these problems are a direct result of owners who have failed to establish pack structure with their dogs.

Establishing pack structure means teaching the dog that he now lives in your family pack and that you are his pack leader. This process also teaches the dog that YOU set rules that he must live by. Once a dog accepts your leadership and your rules he becomes a calm, happy dog.

When a dog accepts a pack leader he is also more willing to listen and follow directions during obedience training.

This DVD will teach the way I establish pack structure with a new dog when I bring it into my home. The goal of my training is to establish leadership and still allow the dog to maintain his dignity. When I introduce my rules I do so in ways that create a level of communication and respect.

The information I show is based on my 45 years of experience in training, breeding over 350 litters of German Shepherds, competing in various sports, and working as a police K-9 handler for 10 years. I've established leadership with more dangerous dogs than I can remember. During this work I have never been badly bitten or even hurt by a dog.

When we establish a meaningful bond with our dog we will both wake up everyday wanting to spend time together. Do not ever underestimate the happiness this kind of relationship can bring to your life.

Until now there has never been a well done training video that teaches pet owners the concepts of how to train with an electric collar. In my opinion the videos that come with various manufacturers collars are terrible. Our DVD solves this problem and is not brand specific.

When used properly low level stimulation from a remote collar is one of the most humane methods ever developed to train dogs. I call it training with an invisible leash. There is a myth that stimulation from an e-collar involves pain. This is simply not true. The majority of the time the levels we use in training cause a sensation that gets the dogs attention but they do not involve any pain.

There are a number of old school theories of how to train with a remote collar. I explain these methods in my DVD and then tell you why the methods I offer are the best I have seen in 27 years of remote collar training.

The goal of all dog training is to teach our dog to follow a voice command. My training methods teach a dog that the stimulation from an e-collar comes from the owner and only after the dog refuses a known command.

Old school trainers make a dog wear the collar for a couple of weeks to condition the dog to collar training. I explain a much better way.

Our DVD also explains what a dog should know before starting e-collar training. It explains how to determine what level of stimulation your dog should be trained with. Every dog is different and every situation is different. I explain the concepts of using the collar and the protocol for taking a dog through each step or stage of this training.

There is also a section on using a remote collar to solve some behavioral problems, like dog aggression. The Basic Dog Obedience DVD is a recommended pre-requisite to this DVD.

Marker training (or clicker training) is one of the most profound systems of training dogs that I have seen in my 50 years of owning, breeding and training working dogs. I had been training dogs for almost 45 years when I started to learn this system. I felt like a kid in a candy store when I saw how well it worked and the attitude of my dogs that were being trained with markers. The fact is I still feel like that when I see dogs work with markers.

Dog training is a learned skill. The goal of this DVD is to introduce dog trainers to the details of training with markers. Trainers must understand the details of this system if they are to be successful. Once they grasp the concept and learn to apply it to their dog training they will create dogs that become problem solvers and dogs that love training. Once trainers learn how to apply the fundamentals of marker training the concept can be applied to any dog sport, including bite work.

You can get a feel for the content of this DVD by going to my web site and reading the article I wrote on The Power of Training with Markers ([leerburg.com/markers.htm](http://leerburg.com/markers.htm)).

Marker training can be started on 8 week old puppies or 6 year old dominant rescue dogs. It is a purely positive method of training dogs that is 100% non-confrontational. That is one of the reasons it can work with dominant dogs. This system goes a long way towards building or repairing the bond between handler and dog.

While I sincerely believe that training dogs with the motivational methods of marker training is the best way to train a dog, I also believe that this work needs to be balanced by introducing corrections into the more advanced training. Purists would argue this point but in my DVD I discuss when and how certain dogs need corrections.

If you have trained dogs for years and think you are pretty good but you do not work with the marker system, I suggest you take a few days and study this DVD. You too may find a whole new method of K9 communication and it may re-ignite a fire in your belly to get out and train.

This is the first DVD in the Building Drive and Focus Series with Michael Ellis. The foundation of Michael's dog training system lies in marker training. The power of his system lies in how markers are applied within his training program. Unlike trainers who claim they can train every dog with 100% positive motivational methods, we know for a fact that corrections should have a place in any serious dog training program. They are required to guarantee reliability under distractions.

Trainers often talk about how to establish focus with a dog. Michael calls this work "engagement." He makes the point that the quickest way to teach a dog exercises is to first train a dog to get and stay engaged with his handler in every environment.

We show you how to take your dog out into new and distracting environments and have a dog that ignores the distractions and maintains an attitude of "What kind of fun things are we going to do here today?" When you can establish a relationship like this, you have a dog that is ready to learn behaviors and exercises.

Stop for a minute and think about that statement. If your dog is distracted, if your dog doesn't want to be where he is, how are you going to train him to do anything? That answer is you only have two options: you either back up your training and engage the dog; or you revert to old school yank and crank dog training.

There are good reasons to teach positions correctly. We will explain long term benefits of the dog learning to sit, down and stand Michael's way. Michael will explain why training positions in the order he recommends will have positive effects throughout the training career of your dog whether you are training a pet or a high level competition dog.

At the end of this DVD we explain the point where and why trainers should start to use toys as rewards in training.

This is the second DVD in the Building Drive and Focus series with Michael Ellis. The first DVD, *The Power of Training Dogs with Food*, (#220-D) and this DVD, teach new trainers how to establish the foundation of Michael's training system on their dogs. Once that is accomplished, the principles of Michael's system can be used to teach a dog any exercise.

Michael's system is based on marker training or operant conditioning. If you are new to markers or new to Michael Ellis' system of dog training, I would recommend you view the free 1 hour streaming video of Michael lecturing on his philosophy of dog training in the streaming video section of our web site. [leerburg.com/flix/](http://leerburg.com/flix/)

You should also review the free 87 page eBook I wrote titled "The Power of Training Dogs with Markers." It's in the list of free eBooks on our web site. [leerburg.com/dogtrainingebooks.htm](http://leerburg.com/dogtrainingebooks.htm)

This DVD opens with Michael's lecture on why and how to play tug with your dog. Michael will demonstrate technique with his dog Pi and then the rest of the DVD uses untrained dogs and untrained handlers.

For the tug to be used as an obedience reward with your dog, you must have 3 things. Your dog must tug with enthusiasm, out when told to out on the first command, and bring the tug back after you release it. The goal of our video is to train dog handlers to accomplish these 3 things.

If your goal with your dog is to do competition obedience, agility work, or to get involved in one of the biting sports, playing tug the right way is an integral part for all those endeavors.

Released  
Fall 2011

This is the latest in Leerburg's series of training videos done with Michael Ellis. It is a training video that follows Michael's curriculum for his course on Motivation and Play at his school for dog trainers in California. The work in this video teaches a trainer the advanced concepts of how to motivate a dog. The techniques work for dogs of all breeds both large and small, and can be used for any dog sport, including agility, obedience, and protection. The goal of this training is to teach dog trainers how to turn a reward into an event for their dog. Once trainers can learn these skills, they can manipulate the motivation and drive of their dogs.

The chapters for this training video are Moving Skills Without a Dog, Rewards as an Interactive Event, Techniques for Increasing Motivation, Borrowing Techniques From the World of Protection Sports, How To Manage Your Dog's Genetics, and Establishing Rules.

In *Moving Skills Without a Dog*, Michael introduces trainers to movement skills they can learn without their dog to help develop and increase a dog's motivation and drive. Trainers will learn about different types of drills they can use. He covers backing, lateral, line, luring, weight shifting and balancing drills. Trainers will also learn skills used without a dog, including tug and toy presentation, and how to handle, hold and deliver food. They will also learn why to use straight line targeting and the problems with hooking, why getting bitten is bad for the handler and the dog's motivation, and how and why misses happen.

*Rewards as an Interactive Event* covers how movement is reinforced during a reward, the difference between a reward event and normal behavior, the difference between hunger drive and movement-based prey rewards, and how the variable duration of a reward event affects reinforcement pause and attention. Trainers will learn how to use auditory stimulators to increase motivation and why chasing and searching are better than having. It also examines the behaviors of tugging, chasing, and eating.

In *Increasing Motivation*, Michael covers how to increase motivation using tools such as restraint and frustration, hunger, and social isolation. He also explains how to use patterns of arousal levels through classical conditioning, and examines which activities can intensify through rehearsal, and which ones don't. In addition, he explains how trainers can restrict and channel a dog's energy use, and which toys and treats are appropriate. He talks about violating a dog's expectations and whether or not to use food and toys in the same training session. He also covers how to balance possession without creating a conflict.

*Borrowing Techniques From the World of Protection Sports* includes an examination of techniques used in protection sports that can be applied here. Michael revisits the motivational techniques of restrain and frustration, using back pressure to build motivation, building the strike factor, targeting, and auditory stimulation. He also explains the concept of letting the dog win.

This is our third in the Michael Ellis series of training DVDs. We feel it's the best one yet. The training information in this video is revolutionary in the world of dog training.

Michael's motivational system of training dogs is based in marker training. You can visit the FREE streaming video section of our web site and listen to Michael's 7-part lecture on his method of dog training.

The foundation for the work in this focused heeling DVD is covered in the 9 1/2 hours of instruction featured in our two earlier DVDs, The Power of Training Dogs with Food and The Power of Playing Tug with Your Dog, that were done with Michael.

The old "yank and crank" methods of training heeling have gone by the wayside. The fact is a good portion of the training in this DVD can be done without a leash and without corrections. In fact, introducing corrections is the very last step in focused heeling.

A full outline of this DVD is available online.

We feel that the work in this DVD is revolutionary. I started going to competitive training seminars in 1974 and have never stopped. I have never been exposed to concepts that even come close to the work in this DVD.

Training dogs to give to pressure is revolutionary in the field of dog training. It teaches young dogs how to live with stress. The concept of "learning how to give to pressure" has been around for years in horse training, no one has introduced it into the world of dog training like Michael Ellis.

This DVD with Michael Ellis was finished in June of 2010. It is by far the most comprehensive step-by-step training DVD on teaching a dog to retrieve that we have ever seen. It has replaced both of our previous retrieval training DVDs.

If you are a student of marker training or interested in marker training you will love Michael Ellis' approach to this work. Because the system is founded in markers, there is a very minimal amount of force used in our training. It is our belief that a dog should not be force trained to retrieve.

We recommend the viewer have an understanding of marker training before beginning this work. This is all covered in the earlier DVDs we have done with Michael Ellis.

In our opinion, no one is ever going to reinvent a better training system on teaching a dog to retrieve than what we have detailed in this training DVD. Michael's system can be used for AKC obedience, for Schutzhund trainers, for any of the ring sport trainers and even field trial retriever enthusiasts.

The production of this DVD was finished in December of 2010. It's by far the best step-by-step training video on how to teach your dog to jump that we have ever seen.

Michael Ellis' system of dog training has its foundation in marker training (operant conditioning). When Michael teaches the jumps, it is all done through motivational methods, there are no corrections. The foundation for all of Michael's training is covered in *The Power of Training Dogs with Food* and *The Power of Playing Tug with Your Dog*. The work in these two DVDs gives trainers the tools they will need to reward their dog in any and every exercise they wish to train a dog. We recommend that trainers know and understand the foundation of food and tug training that's covered in 9 1/2 hours of these DVDs before attempting to teach their dog to jump.

In this jump DVD, Michael explains in detail how to manage your dog's drive during the jumping process. When handlers put their dogs in too much drive the dogs jump flat and have difficulty in jumping. This DVD explains how to determine how much drive your dog needs to learn to jump. Some lower drive dogs need to have their drive increased while high drive dogs need their training steps modified to allow them to concentrate on what you are asking them to do.

Once a dog has learned to jump with fluency and form, we then teach the dog to jump in high drive. Dogs need to learn how to jump when they are in drive during the long jump; during the retrieve over the jump; and during the palisade.

The fact is our jump DVD is 3 training DVDs combined in one. The largest chapter deals with training the hurdle. Then it is followed by a chapter on training the long jump and a chapter on training the palisade.

The DVD opens with an excellent lecture on the concept and training steps for the send away by Michael Ellis. This lecture was filmed at Michael's school on advanced obedience in California. There is a chapter on working with puppies and a chapter on when to use touch pads vs. a toy. There will also be a chapter on training the whistle back (for the ring sports). There is an excellent section on retraining a Schutzhund dog to Michael's system of training the send away and an excellent chapter in which Michael reviews his system.

I enjoyed the production of this training DVD because I learned a lot along the way. Some trainers will think "How much can there be to training this exercise?" Well, let me tell you that Michael has included many, many training steps that cover different types of dogs. He discusses how you approach the training for the high drive dogs and he explains what trainers need to change in their training program to accommodate lower drive dogs.

The beauty of this training DVD is that it has something for the advanced trainer and as well as a step by step program that new trainers can follow.

The DVD contains information to help AKC trainers, Schutzhund trainers and Ring Sport Trainers.

The training concepts in this DVD follow Michael Ellis' training system which has its foundation in operant conditioning. If you are not familiar with marker training or if your dog has not gone through the foundation for Michael's training system, you should run your dog through the work, which is the first two DVDs Ed Frawley produced with Michael Ellis: *The Power of Training Dogs with Food* & *The Power of Playing Tug with Your Dog*.

This DVD covers training puppies that are 8 weeks through adolescence. Adolescence varies from dog to dog. As general rule adolescence ends between 12 months to 16 months of age.

From a training standpoint we detail the work up through teaching a young dog to bite leg sleeves. So in reality this DVD teaches trainers how to train young puppies on up to young dogs that are 12 to 16 months old. At the end of the training in this DVD the dogs will be ready to go onto a body bite suit or they will be ready to learn advanced training skills and exercises that are needed in the biting dog sports.

I went to my first protection training seminar in summer of 1974 and can honestly say that the training in this DVD is the most in depth study on the foundation of bite training for puppies that has ever been done.

The video footage for this production has come from work with Michael Ellis that has been filmed over a 4 year period. We have dogs in this video that were filmed as 10 week old puppies that are 4 years old today.

Michael divides the life of a working dog into five different categories: Pre-Teething, Teething, Adolescent, Young Adult, and Adult.

In this 4 hour DVD, we will cover the foundation of bite work for the first three categories. We will cover, in step by step detail, the foundation of bite work with 8 week old puppies up through teaching adolescent dogs to bite arms and legs on leg sleeves.

The video opens with a lecture from Michael explaining his theory of the foundation of protection training puppies. He discusses the various temperaments of dogs and he talks about what dogs should and should not be trained. Michael does not believe in training dogs that are not genetically capable of doing the work. In fact, one of the chapters of the video shows dogs that should never be protection trained.

## Teaching Protection Skills without a Decoy with Michael Ellis

Teaching Protection Skills without a Decoy is a 2 hour and 55 minute video has been in the works for about 2 years. For the last 10 years, Michael has given seminars 45 weekends a year. Many of the training groups and clubs that Michael taught did not have access to a regular decoy. Over the years Michael developed this training program that allowed his training groups to practice biting skills while he was gone.

Many of the members of these groups have gone on to get Schutzhund and Ring Sport titles. His system has been used on police service dogs, personal protection dogs and even Agility dogs. Many top Agility trainers are learning the value of teaching their dogs advanced tug skills.

This DVD is an in-depth, step by step study of Michael's system on establishing the foundation of biting skills without a helper or decoy. Trainers only need a friend or family member that will handle a bite wedge, a bite tug or a high value toy to assist them in rewarding correct behavior.

The value of the training methods we show are that the dogs learn correct behavior and capping skills at a lower drive level. In the training steps, Michael explains how to start the training for each skill. He also explains when to add drive and stressors for these various protection skills. When these things are done correctly the work with decoys goes much faster and with fewer mistakes.

This is the 6th DVD in our series of training videos that we have done with Michael Ellis. We assume that the people who want to learn the work in this video know and understand marker training (The Power of Training Dogs with Markers and The Power of Training Dogs with Food). We also must assume that the trainers who wish to do this work know and understand the concepts we teach in our DVD titled The Power of Playing Tug with Your Dog. The work in these 3 previous DVDs encompasses 13 1/2 hours of work. It would be impossible to include all that in this DVD.

Chapters include Training the Bark and Hold; Guarding Positions; Contact Heeling; Teaching the Back Transport; Teaching the Side Transport; Defensive of Handler; Foot Targets; Biting Techniques; Targeting Skills; Training Escort Positions and Cues; Training Recalls from a Bites; Environmental Conditioning; Search Behavior; Training the Out (Problem Solving); and Pre-Object Guard Skills.

## The Foundation of Object Guard Training

**Video on Demand | #S126 \$35.00**

Streaming video preview available online.

In this 2 hour and 10 minute video, Michael Ellis teaches dog handlers the fundamentals of training the object guard for the various ring sports. The goal of the video is to show dog handlers how to establish a good foundation for this exercise.

The object guard is the most difficult exercise in all dog sports. In a competition the dog is left alone with an object while the handler moves out of site. When the decoy approaches the dog guarding the object, the dog must bite on its own and release without an OUT command.

In this video, Michael will explain exactly what a dog should know before it starts object guard training. You will learn why Michael prefers to begin teaching this exercise at 7 to 9 months of age. We show the very first training sessions on a number of young dogs.

We also show the 3rd and 4th training lesson on Cindy's dog, Rush, and then the dog in training a year later.

Dogs that start object guard training later in life have often been exposed to a great deal of obedience. When that happens these dogs get "STICKY" – meaning they get stuck on the object and it becomes difficult to get the dog to leave the object to bite the decoy. This is demonstrated by showing a dog that isn't started until its 18 months old. You will see what happens when a dog "STICKS" and the training steps to help a dog get over the problem.

The end of the video shows Michael Ellis and his dog, Pi, in an actual Mondioring III competition doing the object guard.

This video will teach trainers how to establish a proper foundation for the object guard. It does not teach the advanced skills needed to finish a dog in this exercises. It can take years of hard work to perfect a dogs skill in the object.

## How to Raise a Working Puppy

with Ed Frawley

**1 Hour, 15 Minutes**  
[leerburg.com/117.htm](http://leerburg.com/117.htm)

**DVD | #117-D \$40.00**  
**Video on Demand | #S117 \$35.00**

There is a big difference between how one should raise a working puppy and how pet owners raise their pets. Working puppies are expected to look at their world with more self confidence. It does not make any difference if you are raising a Schutzhund puppy, a police service dog puppy, a puppy for personal protection work, or a puppy for competition obedience or agility. They can all benefit by making some simple changes in how they are brought up and handled.

This is not a bite training video. It is a video teaching people how we raise our pups here at Leerburg. This video outlines a step-by-step manner how to socialize, imprint, and prepare your puppy for his or her working career. This is a common sense approach that anyone can do. The key to raising a successful working puppy is to have a plan and make the best use of the time you spend with your dog. An example of this is: one can take their pup for a walk and have it just be exercised; or one can take their pup for a walk and make it an experience in which the pup gets exercise, along with a chance to learn MARKERS and be introduced to environments that provide a small level of stress for the pup to learn to work through.

This dog training DVD deals with the following topics:

1. Should the working pup be a house dog or a kennel dog?
2. Manage and neutralize a working pup to training collars.
3. Teaching a working puppy that a vehicle is going to be a part of its career.
4. Learning to be neutral to other dogs.
5. Socializing, or "neutralize," our pups to strange environments.
6. The manners of a working puppy.
7. It is very common for new trainers to over exercise their puppy. We cannot tell anyone exactly how much to exercise their pup, but we do talk about some of the guidelines that we take into consideration.
8. Medical issues and a working puppy. It is a given that a working puppy is going to be exposed to more examinations by a stranger (a Vet) than the average dog. We believe that a little forethought at an early age goes a long way towards eliminating a dog getting stressed over this as an adult.
9. Games and toys.
10. If you are raising a working puppy you are probably going to have a dog with a degree of drive. While this video does not show how to bring out that drive (my video Building Drive and Focus does that) - we do caution people that "JUST BECAUSE YOUR PUP CAN DO SOMETHING DOES NOT MEAN IT SHOULD DO SOMETHING."

## Dealing with Dominant & Aggressive Dogs with Ed Frawley

**3 Hours, 30 Minutes**  
[leerburg.com/301.htm](http://leerburg.com/301.htm)

**DVD | #301-D \$49.00**  
**Video on Demand | #S301 \$40.00**

 Streaming video preview available online.

While I have seen a number of books that define dominance, I have never seen a book, much less a DVD, that trains people how to properly deal with or train dominant dogs. If your dog is growling at you, your family members, your friends, or visitors to your home then you need to take steps to control this aggression.

Every year hundreds of thousands of dogs go through obedience classes. The majority of dominant dogs that go through these classes come out just as dominant as before they started. The reason for this is that instructors and owners do not address issues of pack drive and rank within the pack.

Our DVD was produced to help people analyze their dog's aggression problems. I then provide information to help owners solve these problems.

The vast majority of local dog behaviorists are unqualified to offer advice on dog aggression or dominance. Many think the solution to dominance and aggression is through positive motivation. These people are almost always wrong. The best solution is always through respect and leadership.

This DVD provides enough information to help dog owners either solve these problems themselves or be in a position to determine if a local individual is qualified to assist in their dominant or aggressive dog problems.

This DVD covers:

1. Types of dominance & the triggers that cause a dog to display dominance
2. Recognizing the signs of dominance
3. Living with and training a dominant dog
4. Problem solving
5. Picking a behaviorist

If your dog is becoming animal aggressive and you want to learn how to live with and control an aggressive dog this DVD will help you.

## What's New for 2012

Between Ed's son, Jeff, coming to work with the Leerburg team and the addition of our state of the art Video on Demand, 2012 should be an exciting year here at Leerburg.

Leerburg plans to continue our series of training videos with Michael Ellis. In 2012 we be will produce a training video on teaching new helpers and decoys. We have collected video footage over the past 5 years in addition to filming Michael's decoy classes that are held several times a year at Michael Ellis' School for Dog Trainers in California.

With the help of Andrew Ramsey, Leerburg also plans on releasing new scent work DVDs. Andrew is a former DoD (Department of Defense) Civilian Military Working Dog Training Instructor and DoD Breeding Program Lead Trainer. There are new and exciting civilian dog sports that deal exclusively with scent work competitions. These DVDs will teach dog handlers how to train their dogs to compete in these new sports.

Ed and Cindy are also working on the expansion of information available for dog owners who simply want a great family companion. We have started filming for a video that will help new puppy owners integrate their new dog into their home and family life. These projects will be announced in our regular email newsletters.

In 2012, Jeff and Ed will begin to work on the production of several police K9 training DVDs with Kevin Sheldahl. Kevin is a police K9 handler in New Mexico. He is also an international police K9 instructor and judge. Over the past 20 years, Leerburg has done a number of police K9 videos with Kevin. It is time that some of these videos are re-done and updated. In addition, we have a couple of new projects that we have been working with Kevin.

If you are new to Leerburg you can learn about our new training videos by subscribing to our newsletters. [leerburg.com/subscribe.htm](http://leerburg.com/subscribe.htm)

## Whelping Puppies and Their First 8 Weeks DVD

DVD | #118-D \$40.00  
 Video on Demand |  
 #S118 \$30.00

This video explains how to prepare and assist a bitch in whelping a litter of puppies. There is extensive video of females whelping pups. It tells the breeder exactly what needs to be done during the birth and throughout the first 8 weeks of a pup's life. Ed Frawley has been breeding German Shepherds since 1978. He has bred over 350 litters. You will benefit from the practical experience he has gained in whelping this many litters.

It takes you through the trials of dealing with sick puppies. It shows exactly how to tube feed a weak puppy and provides a medical program to follow for the entire litter. As puppies go from day one to 8 weeks of age, they go through a series of changes or stages of development. The video is divided into weekly segments. We explain the added responsibilities of the breeder as the pups approach and go through the weaning process. The concepts that are explained in this video can be applied to every breed of dog.

## Puppy Tube Feeding Kit

## How to Tattoo Your Puppies DVD

32 Minutes  
[leerburg.com/411.htm](http://leerburg.com/411.htm)

DVD | #411-D \$15.00  
 Video on Demand | #S411 \$12.00

I personally prefer to tattoo my pups versus putting a computer chip in them. There are too many kinds of computer chips, and each needs its own chip reader. Anyone can look in the ear of a dog and see that it is tattooed. If anything, I would recommend both a chip and tattoo. This DVD can be yours for free when you purchase the complete set of Hauptner's Tattoo Equipment (See Below).

This video is directed towards the dedicated dog breeder. It is an instructional video teaching people how to tattoo their own puppies. The video deals with Hauptner tattoo equipment from Germany. Hauptner makes the best tattooing equipment in the world for dogs. The video was filmed at a tattooing seminar in California. Debby Gundherr is the instructor. She has tattooed over 1,300 dogs in the past 10 years. She is also on the Schutzhund USA breed committee. During the seminar, Debby tattoos a litter of puppies. There is excellent video showing the exact procedure to follow. Includes a step by step review at the end of the video.

## Hauptner Tattoo Equipment

Hauptner is without a doubt the finest tattoo equipment in the world. Meant to last a lifetime. Used to tattoo puppies ears. Manufactured in Germany and is the only tattoo equipment used by all of the breed clubs in Europe. Prices are subject to change as the value of the Euro fluctuates vs. the value of the US dollar. ## Training Police Service Dogs

1 Hour, 40 Minutes  
[leerburg.com/104.htm](http://leerburg.com/104.htm)

DVD | #104-D \$25.00  
Video on Demand | #S104 \$20.00

This video assumes the viewer understands the basics of bite training. Many police departments waste thousands of dollars in officer training time with dogs that never should have been selected as a Patrol Dog. This video shows how to test a dog to determine if it has the necessary drive to do police work. We show how to train a dog to target its bite to the entire body starting with leg bites, then leg to arm transfers, arm to leg transfers, and finally, back and shoulder bites. More information available online.

## Training Building Search for Police K9 Dogs

2 Hours  
[leerburg.com/122.htm](http://leerburg.com/122.htm)

DVD | #122-D \$30.00  
Video on Demand | #S122 \$20.00

This video deals with the process of developing a police dog's skill in locating criminal suspects hiding in a building. New officers often over estimate their dog's ability to perform this skill. Over estimating a dog's scenting ability is bad dog training and it could get you killed. The video includes; temperament, where a dog should be in training, most common problems and a step by step breakdown, pursuits into a building, learning indications, off lead control and more.

## Muzzle Fighting for Police Service Dogs

1 Hour, 20 Minutes  
[leerburg.com/121.htm](http://leerburg.com/121.htm)

DVD | #121-D \$40.00  
Video on Demand | #S121 \$35.00

This training video deals with "Muzzle Fighting" for police service dogs. Working in muzzle is one of the least understood exercises in protection work. The video takes the viewer step by step through muzzle fighting. There is a real difference between what we show in this video, and what happens when someone just throws a muzzle on a dog and sends him after a helper without a sleeve. The goal of this video is to train a dog in muzzle to alert on a passive suspect located some distance from his handler.

## Training Narcotic Detection Dogs

1 Hour, 45 Minutes  
[leerburg.com/109.htm](http://leerburg.com/109.htm)

DVD | #109-D \$25.00  
Video on Demand | #S109 \$20.00

Using a narcotics detection dog is the most unobtrusive method available to search a suspect's vehicle, house, or belongings. The goal of every narcotics dog handler should be to eliminate false indications by his dog. This video emphasizes training techniques that will provide you with a dog that not only finds drugs, but one that will not false hits. This video details selection testing dogs for narcotics work and discusses the types of narcotics to train with and the safety measures a handler is required to take with the different types of drugs.

## Bark & Hold Training for Police Service Dogs

2 Hours  
[leerburg.com/123.htm](http://leerburg.com/123.htm)

DVD | #123-D \$30.00  
Video on Demand | #S123 \$20.00

Training a police dog the Bark & Hold is very different from training a sport dog the B&H. Most service dogs come from the ranks of sport dogs. They must quickly change their view of the helper from someone that is a prey object, to someone who is a fighting partner. Trainers do not have months to accomplish this, in most cases it must be done in weeks. This video shows how to get a serious bark and hold out of a genetically correct dog. The video is a must for every K-9 handler and sport trainer that wants to train a more serious dog.

## Training Off Leash Control with Directed Search for Police K9

1 Hour, 30 Minutes  
[leerburg.com/125.htm](http://leerburg.com/125.htm)

DVD | #125-D \$25.00  
Video on Demand | #S125 \$19.00

The directed search is one of the more important exercises that police K-9 handlers must teach their dog. If a service dog is to work safely off leash it must know the directed search. K-9 handlers must have complete control over their dogs at all times. The training segments for this tape are; Training the Recall under Extreme Distraction, Teaching the Blind Search on a Training Field, Teaching the Directed Search in a Building, and Drive Building Exercises for Directed Search.

## Tactical Training with Police Service Dogs

1 Hour, 40 Minutes  
[leerburg.com/111.htm](http://leerburg.com/111.htm)

DVD | #111-D \$20.00  
Video on Demand | #S111 \$15.00

Police K9 training programs need to simulate actual street situations. This video shows a number of common scenarios that have actually happened. We recommend several changes to training programs that will compensate for past mistakes. These changes result in a safer situation for the officers and their dogs. Working a dog under friendly fire is covered in detail. We also show how to train a dog not to be aggressive to gun fire and arrest procedures with a dog.

## Scent Work Scratch Box

This scratch box can be used for narcotics dog training, explosive dog training or accelerant dog training. Designed after scratch boxes that are used in the Federal police dog schools in Holland. The Dutch are masters of scent work. An excellent training tool that can be used to proof dogs off of odors in addition to locking dogs onto odors. The best application for these boxes is to have 5 to 7 boxes hung on walls or on 2x4 racks that you mount in a room. These boxes can also be used to train accelerant dogs. DVD | #208-D \$30.00  
Video on Demand | #S208 \$20.00

This video was also done with the RCMP in Canada. In it we train a dog to track in a suburban and urban environment. In Level One Tracking (#205-D) we taught the dog to track in the country. All police dogs must first learn to track in the country because the it is relatively distraction free. We teach the dog to track in the country and then teach the dog to deal with the distractions of the city.

## Track Laying for the Police Tracking Dog with Ed Frawley

When done properly, protection training is extremely complex. If the foundation for protection work is not 100% correct, it is only a matter of time before the dog and handler run into problems. The goal in producing this video was to show that a person with little or no dog training experience can understand how to lay this foundation. This video is a must for training new helpers. It identifies the drives a dog works in, critical distance, and avoidance. So the new helper has a clear picture of exactly what their role is in the training process. The training in this video will work with dogs of any age from 6 months and older. More information available online.

## The First Steps of Defense with Ed Frawley

DVD | #101D-D \$65.00  
Video on Demand | #S101D \$55.00

For a dog to do police service, serious personal protection, or good Schutzhund work, it must have a solid foundation in defensive drive training. Before this can take place, the dog must have already gone through prey bite development and it must have reached mental maturity. Starting defense work too young can ruin a dog's working ability for life. For years people in this country have only trained dogs in prey drive. In fact, even today many dogs are still trained only in prey drive. This is a serious mistake if the handler ever expects that dog to do any form of personal protection. Dogs trained only in prey do not protect their handlers. More information available online.

## Training Personal Protection Dogs with Ed Frawley

[leerburg.com/105.htm](http://leerburg.com/105.htm)

DVD | #105-D \$65.00  
Video on Demand | #S105 \$55.00

This video assumes a dog has already gone through bite development. This means "you and your dog" know and understand the material in our bite development videos. This video shows how to target the dog's bite to different parts of the body. This is taught in segments using body bite suits. Although the concepts are similar to those covered in our video 104 "Police Service Dogs," most Personal Protection dogs are not as strong as patrol dogs, and therefore need more training steps in their program. We show you how to do this. Muzzle work is the only way to proof a dog that has been trained in body bites. Muzzle training is broken into 6 steps followed by a section on "Helper Hints" for effective muzzle work. We then discuss 4 methods of putting defense or civil drive into your dog.

## Training Dogs to Get Along with Horses DVD

with Ed Frawley

DVD | #211-D \$20.00

Here at Leerburg we own horses and a number of dogs. We used to breed German Shepherds and Belgian Malinois and we also own a Corgi. We also own Rocky Mountain gaited horses and quarter horses. A number of years ago when we decided to add horses it quickly became evident that we needed to train our dogs to get along with our horses. We did not expect our dogs to become good buddies with our horses but we did expect them to learn to live peacefully with the horses. Cindy and I have years of experience with both horses and dogs. This DVD teaches people how to desensitize their dogs to their horses. In our step-by-step program we teach our dogs to accept our horses as part of their family pack. This DVD was filmed over a 2 1/2 year period. We followed the training steps for one of our personal dogs, CJ. The viewer will have the opportunity to see CJ's first exposure to a number of the training steps we recommend in this DVD. People can see the issues that came up with him and then relate to problems they may have with their own dogs and horses.

#417-D \$100.00

Learn how to Clicker Train Your Own Assistance Dog with this **four** part DVD series produced by Barbara Handelman, M.Ed. Includes CD "How to Use this DVD Series" with manual, scripts, and complete table of contents. For best use of this series of DVDs, the trainer should have a worked with clicker training basics and the essential tenets of canine learning theory. It's important for the dog to be fluent with essential "obedience" skills, as well as being both comfortable and safe working off lead. All of these behaviors should be on cue, before attempting to train the complex skills.

## i-Click Clicker

The i-Click Clicker was designed by the clicker trainers at Karen Pryor Clicker Training. This clicker is great for anywhere. It has a less harsh 'click.' The i-Click Clicker was designed to work for everyone. The trigger or center of the clicker has been engineered so that only a small amount of pressure is needed to 'click.' Colors may vary. [leerburg.com/1108.htm](http://leerburg.com/1108.htm)

#1108 \$2.09

## Leerburg Clicker

We are big fans of MARKER training here at Leerburg which can include using a clicker. If you are not familiar with what this is and want to learn about this very exciting way to train your dog. Wrist coil works well with a clicker. [leerburg.com/765.htm](http://leerburg.com/765.htm)

Carabineer Key Ring #1174 \$6.00

## Dog Whistle

This high quality metal whistle is used to train your dogs to come. It works great for long distances. The whistle is the perfect solution for people who do not have loud or strong voices, or those that allow their dogs to run in areas with a lot of noise. This is not a silent dog whistle. [leerburg.com/743.htm](http://leerburg.com/743.htm)

#743 \$11.00

## Metal Ball Clip

This ball clip is made of metal. Used during focus and drive training. By clipping the ball to the ball clip around your neck, it allows you to have your hands free and lets the dog focus on the ball and the handler's face, rather than their hands. [leerburg.com/894.htm](http://leerburg.com/894.htm)

#894-1 \$12.00

## Bear Spray Black Bears, Grizzly Bears and Aggressive Dogs!

If you walk your dog in areas where there are aggressive stray dogs that run loose carrying a can of bear spray could help protect you and your dog from a dog attack. Pepper spray does not work 100% of the time. Developed in conjunction with a research study that included bear biologists and then was extensively field tested by wildlife management specialists. During the development stages, Counter Assault carefully listened to wildlife management specialists, outfitters and individuals that were involved in bear encounters. Recommendations were established based on their experiences with bears. Testing was performed on extremely agitated bears that were removed from our parks and forests for being too aggressive. Counter Assault has continued to monitor the suggestions and recommendations from bear experts. Holster included. Ships only within the continental US. [leerburg.com/1212.htm](http://leerburg.com/1212.htm)

#1212 \$49.95

## Jute Bite Pillow

This bite pillow is used in later stages of bite development. An integral part of the foundation work in protection training. The process starts with a ball on a string, moves on to various kinds of bite tugs and when the dogs are solid in that part of training they are moved onto the bite pillows. Work on these pillows gets the dog ready for work on sleeves. 13" x 9" with 3 handles. Imported from Europe. [leerburg.com/896.htm](http://leerburg.com/896.htm)

#896-1 \$43.00

## Mini Bite Pillow

The mini bite pillow is used with young dogs whose mouths are not large enough to bite the larger bite pillows that we sell. The bite pillow is a very important part of this training. It is used in the training step after the tug work. If you have a young dog you should have this item. Made of synthetic body bite suit material. Approximately 11" x 5.5" in size. [leerburg.com/895.htm](http://leerburg.com/895.htm)

#895 \$39.99

## Seynaeve Bite Suits 🇧🇪

### Imported from Belgium

*Pictured: Jeff Frawley*

I have been around body bite suits since 1985 and I have never seen a suit that comes close to the quality of these Seynaeve Bite Suits. There are cheaper suits on the market, but when you're faced with an 85 pound adult Malinois, that's a very serious dog, skimping on the protection offered in a suit is not where you want to save money.

Go to our web page [leerburg.com/suits.htm](http://leerburg.com/suits.htm) to see more photos and videos of the Seynaeve Bite Suit.

#### Special Order Item

Each Seynaeve Bite Suit is tailor made the the specific measurements of the decoy. If you look at the self measuring form you will see how detailed the fit is for each suit. This is a huge advantage to the decoy because it helps eliminate pinching in the suit.

With that said it takes 5 to 8 weeks to construct and ship. Pre-payment required. THERE WILL BE NO RETURNS.

See image below for color swatches.

#### Measure YOURSELF for our Seynaeve Bite Suit:

When you check out, fill out the SELF MEASURING FORM available online. [leerburg.com/suits.htm](http://leerburg.com/suits.htm)

1. You can print the form, fill it out, and fax to 1-715-235-8868
2. Or electronically fill in the fields (with a program such as Photoshop) and email to [orders@leerburg.com](mailto:orders@leerburg.com).

3. Or print the form, fill it out, scan it and email to [orders@leerburg.com](mailto:orders@leerburg.com). If you have already placed your order, please put your order number in the email.

#### Payment Methods

Bite suits are a special order item, they are paid for when the order is placed. We will accept credit card payment on suits with a couple of rules in place.

We only accept credit card payments for domestic/USA bite suit orders. We always contact the card issuing bank and verify the card holders name and the billing address associated with the credit card used for payment. We only ship the bite suit to the billing address for that credit card. We will not ship to an alternate address.

Signature will be required upon delivery.

International purchases of bite suits must be paid with Money Gram or a Wire Transfer of funds. All import duties and taxes are the recipients responsibility.

#### Colors

Available in A) Deep Red, B) Royal Blue, C) Black, D) Bordeaux, E) Camouflage, F) Yellow, G) Army Green, H) White, I) Almond Gray, J) Flou Orange.

## How to Fit a Prong Collar

[leerburg.com/fit-prong.htm](http://leerburg.com/fit-prong.htm)

I train dogs with prong collars. There are very few dogs that I would not train with a prong collar. I recommend them to new dog owners, new trainers and people who own dogs with behavioral problems. While some think a prong looks nasty the fact is they are far more humane than a normal choke collar.

The biggest problem with prong collars is that new dog owners don't know how to put them on, how to size them, or how to have their dog wear them. This article will address these issues.

Another common problem new trainers have is they don't remove enough links to get the correct snug fit. When that happens the collar hangs down on the dogs neck which results in the collar not working the way that it was designed.

Normal choke collars need to be ordered by length (i.e. 22 inches long etc.). Prong collars on the other hand are ordered by weight: extra heavy, heavy, light, etc. They all come in a standard length which is adjusted to fit the neck of the dog by removing or adding links to the collar.

Prong collars are meant to be put on and taken off before and after daily training sessions, unlike a choke collar that is left on the dog all the time (in some cases this can be a dangerous practice).

When using a prong collar during a training session, it is strongly recommended that the trainer use a Dominant Dog Collar™ in addition to the prong collar. Prong collars can come apart, often when they are needed most, and while this is a rare occurrence the results can be both dangerous and devastating. This can be prevented by always using a Dominant Dog Collar™ as a backup whenever a prong collar is used.

Leerburg's new patent pending Prong Collar Leash™ enhances the effect of using both a prong and a Dominant Dog Collar™ by ensuring both collars deliver the appropriate levels of correction and by making it easier to attach both collars simultaneously while retaining maximum control over the dog. We strongly recommend that a Dominant Dog Collar™ and Prong Collar Leash™ be used whenever a dog is wearing a prong collar.

**Left: This photo demonstrates a prong collar that was not properly sized for the dog. The collar is too loose and riding too far down on the dog's neck. It should be up where I have drawn the yellow line.**

**The correct position for a prong collar is to sit right behind the dog's ears and up under the jaw line. This is shown in the photo below.**

**Right: A perfect safety procedure to use along with a prong collar is a dominant dog collar. I offer this advise to ALL those trainers who use prong collars.**

**It is not unheard of for a mistake to happen and a prong collar comes apart when you need it the most. By having a Dominant Dog Collar™ on the dog at the same time as the prong this will never be a problem. Using Leerburg's Prong Collar Leash™, simply attach one clip of the leash to the prong collar and the other to the Dominant Dog Collar™. This is shown in the photo below. [leerburg.com/5131.htm](http://leerburg.com/5131.htm)**

## Dominant Dog Collars™ vs. Muzzles

Many times people make the decision to use a muzzle on a dog when in fact they should be using a dominant dog collar™ and a muzzle or in some cases just a dominant dog collar. Muzzles often just cover a dog's problems and do nothing to solve an aggression problem. These people need to learn the difference.

Our dominant dog collars are designed specifically to deal with handler aggressive or dog aggressive dogs. If you have a problem with aggressive or dominant dogs I would recommend that you go to my article section and read what I have written about Dominant and Aggressive dogs at: [leerburg.com/articles.htm](http://leerburg.com/articles.htm). I also recommend that you get my DVD on Dealing with Dominant and Aggressive Dogs. [leerburg.com/301.htm](http://leerburg.com/301.htm)

More dogs are put to sleep every day for aggression problems than I care to think about. I am the first to agree that some dogs are beyond saving, but many of these dogs could have been retrained and saved. Killing a dog should ALWAYS be a last resort. Using these collars can and will make the difference between having to put a dog down or ending up with a dog the owner can live with.

I recommend that you go to my web site and read the article on "How to Fit the Leerburg Dominant Dog Collar™" at [leerburg.com/746.htm](http://leerburg.com/746.htm), and the video on "Dealing with Dominant and Aggressive Dogs" explains in detail how to use this collar and what dogs to use it on.

# PRONG COLLARS

## Herm Sprenger Prong Collars

**Stainless Steel Prong**

**Curogan Prong**

**Chrome Plated Prong**

 I call prong collars "Power Steering for Dogs." It is probably the most misunderstood training tool there is. So many people take one look at it and say "Oh! I could NEVER use that on MY dog!" Then when I explain how it's used and why it's used they call back and say "ED, THIS IS THE GREATEST THING!" When a prong collar is used in training, the handler must realize that a dog who required a level 8 correction before will probably require a level 2 or 3 correction with a prong. So a strong dog with too much drive for a small person to handle is now easily controllable without a lot of effort. If you are a new Schutzhund trainer or a police service dog handler, you will need a prong collar. Curogan is a copper-tin-alloy with a high copper portion and some additives which make the material strong, but without any nickel. Nickel is often responsible for allergic reactions of sensitive dogs and causes of some skin rashes. These chains avoid a discoloration of fair haired dogs. *\*For more information and how to fit your dog's collar check out our web site at: [leerburg.com/prong.htm](http://leerburg.com/prong.htm)*

## Dogtra 7000M Plus

**TWO Receivers - ONE Transmitter**  
**Dogtra 7000M**

*The best remote collar system anywhere!*

This is a special order system we asked Dogtra to put together. It works so well we have started to stock them. This system is identical to the regular Dogtra 7000M with the exception of an extra receiver on the collar strap. The main purpose of this is not to deliver a stronger stimulation to the dog, but allow us to not have the remote collar so tight.

The problem with single receiver systems is quite often the strap holding the collar has to be very tight on the dog's neck just to make sure the probes make contact. This system eliminates that problem. When dogs do bite work their neck muscles swell, just like a human arm muscle gets bigger right after lifting weights. It is temporary, but if you look at a dog's neck shortly after it has finished a training session, his neck muscles are pumped. Your dog may start a training session with a remote collar fitting perfectly, but as his neck swells during the training session the collar becomes tighter and tighter, restricting blood flow and breathing. When that happens you have shorter training sessions.

The number one benefit, is that the collar can be looser on the dog's neck while the probes maintain contact with the neck. You are actually able to start a training session with enough slack for the dog's neck to swell and still not interfere with breathing or blood flow as the neck swells. ## Tri-Tronics Bark Limiter

The Bark Limiter is much smaller, lighter and still the most effective and reliable bark collar on the market. It provides very gentle but persuasive control of excessive barking. The Bark Limiter can be worn by even the smallest dog. The Bark Limiter dimensions are approximately 1.8" wide, 1" deep and 1" high, without contact points installed.

The Tri-Tronic "Bark Limiter" is the most effective way to stop a dog's annoying bark. The collar is activated by vibrations from the dog's neck and not outside sounds. Barking is usually eliminated within 24 hours of putting the collar on your dog. Change the stimulation level with the press of a button. The Bark Odometer™ tells you how many times the dog barked since the collar was turned on.

Five different stimulation levels. The LED screen tells you what level of stimulation it is set on. Short and long changeable contact points are included. Waterproof user-replaceable CR2 lithium batteries are included. Replacement batteries can be purchased at most retailers. 30 day money-back guaranty. Full one year warranty. ## Ventlock Tailgate Lock

**The Ventlock Tailgate Lock** allows more ventilation into your car than just leaving windows open. It works by fixing the rear door or tailgate in a semi-open position and combined with a front window open just an inch or two, it allows free flowing air just where the dogs need it most - on their nose at the back of the vehicle. Another major advantage is that with the Ventlock secured between car and tailgate all but the most determined thief will be

kept out. It takes only a few seconds to fit or remove and the car can be locked in the normal way using either the key or central locking. Best of all it fits 99% of Estate Cars / Hatchbacks / Vans or 4 Wheel Drive vehicles fitted with a rear door. More photos & info available online. ## Solid Gold Dog & Cat Food

### Sun Dancer Dog Food

Sun Dancer is a chicken based gluten free dry dog food with a moderate protein and fat content. Sun Dancer includes three exciting new ingredients; tapioca, chia seed, and fructooligosaccharide (FOS). Tapioca is derived from a gluten free root vegetable and is an excellent source of starch which is vital to the production of dry pet foods. Chia seed is an excellent source of omega 3 fatty acids and has a naturally balanced ratio between omega 3 and 6.

Chia is also full of protein, vitamins, and minerals. Fructooligosaccharide (FOS) is a prebiotic, which can help improve overall digestive health. Palatability and digestibility studies have shown Sun Dancer to be one of the most palatable and digestible foods in the Solid Gold line and against key competitors. Our own dogs go crazy for it and we are sure it will be as big of a hit with Solid Gold dogs around the world. Ingredients available online. [leerburg.com/dancer.htm](http://leerburg.com/dancer.htm)

### Barking at the Moon Dog Food

Grain Free, High Protein, Low Carbohydrate dry dog food for performance dogs. We are raw feeders and promote raw feeding for dogs and cats, but the reality is that not everyone can feed their pets a raw diet. With help from some of our nutritional consultants, we sorted through the vast variety of commercial products available and narrowed it down to products we felt comfortable feeding our own dogs and cats. Our criterion was as follows, human grade quality ingredients and no grains. Barking at the Moon Dog Food met all of our criteria and was one of the top grain

free kibbles on Whole Dog Journals "best" list. Many of our fellow dog breeders feed Barking at the Moon to their breeding and working dogs in conjunction with a raw diet with excellent results. [leerburg.com/barkingmoon.htm](http://leerburg.com/barkingmoon.htm)

The Michael Ellis School for Dog Trainers is now open!

On September 15th, 2009, Michael Ellis started his school for dog trainers in Fairfield, California. I went to my first dog training seminar in October of 1973 and since then have attended hundreds and hundred of seminars and traveled all over America and Europe filming various people training dogs. I have never met a more gifted dog trainer than Michael Ellis and I feel lucky to call him my friend.

If you own a local dog training business then you should consider attending Michael's school because you are the person Michael is directing his courses towards. Training dog trainers is what he has done almost every weekend for the past 10 years. At times I find myself wondering where dog training would be in this country today had we had Michael Ellis around 25 years ago when I started attending training seminars.

If you want to take your training to the next level and beyond you should consider attending some of Michael's short courses. He understands that its difficult for people to take large blocks of time away from work and family, which is why he has kept his courses short.

### Establishing Pack Structure with the Family Pet 4 Hours, 9 Minutes

All Dogs are pack animals. Every breed of dog is hard wired with genetic pack instincts. The smallest Chihuahua to the largest Great Dane wants to live in a dog pack. They also genetically want to establish leadership and rank within their pack. See page 4.

### Focused Heeling with Michael Ellis 3 Hours, 57 Minutes

Michael's motivational system of training dogs is based in marker training. The old "crank and yank" methods of training heeling have gone by the way-side. The fact is a good portion of the training in this DVD can be done without a leash and without corrections. In fact, introducing corrections is the very last step in focused heeling. See page 7.

### The Power of Training Dogs with Food 3 Hours, 45 Minutes

This is the first DVD in the Building Drive and Focus Series with Michael Ellis. This system establishes a method of communication with our dogs that is built on positive reinforcement. It is a communication system that is "black and white" to our dogs. This work builds a non-confrontational relationship with a dog. See page 5.

### Your Puppy 8 Weeks to 8 Months 1 Hour, 59 Minutes

This 1 hour and 59 minute DVD has been one of our most popular training videos for new puppy owners. Over the years Ed has been asked just about every question a new puppy owner can think to ask, from potty training to crate training and more. See page 3.

### Basic Dog Obedience 4 Hours

This 4 hour DVD will teach you everything you need to know to teach your dog basic dog obedience. Your dog will learn to sit, down, come and more! This is our best selling DVD! This DVD applies to all breeds. See page 3.

### The Power of Playing Tug with Your Dog 5 Hours, 25 Minutes

This is the second DVD in the Building Drive and Focus Series with Michael Ellis. This DVD opens with Michael's lecture on why and how to play tug with your dog. Michael will demonstrate technique with his dog Pi and then the rest of the DVD uses untrained dogs and untrained handlers. See page 6.
